

## Special Issue

# The Contribution of Geography in Supporting Sustainable Development Goals (SDGs)

### Message from the Guest Editors

As a discipline with a profound interdisciplinary character, studying the complex interactions between the nature and the society, Geography can bring an important contribution to support the achievement of Sustainable Development Goals. It can offer a local to a global perspective of a variety of topics covered by the SDGs, as for example, SDG1 (No poverty), SDG2 (Zero hunger), SDG3 (Good health and well-being), SDG4 (Quality education), SDG6 (Clean Water & sanitation), SDG7 (Clean Energy), SDG11 (Sustainable cities & communities), SDG12 (Sustainable production and consumption), SDG13 (Climate), SDG14 (Life below water), SDG15 (Life on land), SDG17 (Partnerships for the goal).

In this respect, the Special Issue is focused on innovative sustainability-oriented geographical research on the topics covered by SDGs exemplified above, that explore the diverse social, environmental, economic and cultural contexts at various spatial scales.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
