

Special Issue

Geoinformation Technologies in Agriculture and Environment Protection for a Sustainable Future

Message from the Guest Editors

With the increasing demands for efficient and environmentally friendly land management, the development of advanced spatial methods and models has become a growing necessity. This Special Issue is designed to connect various interdisciplinary fields with modern, efficient, and flexible geoinformation technologies in the GIS environment for sustainable land management.

Submissions are encouraged to cover a broad range of topics that are conceptualized as the basis for decision making in sustainable land management. Possible topics include, but are not restricted to: agricultural land management, environment protection, precision agriculture, urban planning, and other interdisciplinary sciences that are closely related to a sustainable future in the scope of agriculture and environment protection. Due to the flexibility of GIS and other geoinformation technologies various case studies are also encouraged for submission, which are valuable for experts from any location in the world to evaluate their own methodology in their chosen fields.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
