

Special Issue

Global Digitization: Digital Literacy, Inequality, and Wellbeing among Diverse Populations

Message from the Guest Editors

This call for papers for a Special Issue is a global forum that focuses on digital literacy and human beings' wellbeing. There is an increasing interconnection between the domains of digital technology and society. Digital advancements are supporting and accelerating the achievement of sustainable development in light of enhancing connectivity, financial inclusion, access to trade and public services. However, people's everyday practices with digital media have changed, and inequalities caused by the uneven diffusion of new technologies are being revealed, especially as the world is challenged with one of the biggest public health crises of the century—the COVID-19 pandemic.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada
