

## Special Issue

# Global and International Logistics

### Message from the Guest Editors

We are calling for papers for a Special Issue of the journal *Sustainability* on research related to global and international logistics. In the present world, with the recent advances in the globalization of trade and economic activity, research on the logistics issue should be approached from more global or international viewpoints, to achieve the sustainable economic development in the world. Global issues on the logistics field include not only international cooperation and cross-border issues, but also intermodal transport, global shipping network analysis, supply chain integration and coordination, intelligent transport system and information technologies, green and reverse logistics, impacts of China's Belt and Road Initiative, and others. Furthermore, since the current advancement of information technologies enables us to use some kinds of big data in the global logistics field, we also encourage you to propose new ideas on big data analysis in this field.

### Guest Editors

Prof. Dr. Ryuichi Shibasaki

Prof. Dr. Daisuke Watanabe

Dr. Tomoya Kawasaki

### Deadline for manuscript submissions

closed (28 February 2021)

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
