

Special Issue

Energy and Climate Change Policy and Governance in Small Island States

Message from the Guest Editors

The Intergovernmental Panel on Climate Change (IPCC) notes that, “Some vulnerable regions, including Small Islands and least developed countries, are projected to experience high multiple interrelated climate risks even at global warming of 1.5°C”. Small islands have made steady progress by developing new policy frameworks and governance systems to meet the challenges of climate change adaptation, clean energy security and sustainable development. For this Special Issue we invite papers dedicated to advancing knowledge about decarbonizing the island energy sector to mitigate and adapt to the effects of climate change in the island context. Topics should revolve around policy design, analysis, assessment, implementation or evaluation including policy level instruments, tools and mechanisms, either proposed or deployed. For further reading, please visit the [Special Issue Website](#).

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
