Special Issue

Green Restoration of Polluted Environment

Message from the Guest Editors

This Special Issue welcomes submissions of papers addressing any aspects of contaminated environment remediaton/restoration (e.g., water, soil, and mines contaminated by heavy metals, organic matter, and any other pollutants) by green or sustainable technologies. All submitted papers should be related to (but not limited to) bioremediation, electrokinetic remediation, green chemistry restoration, preparation of functional and ECO materials, etc., that possess the characteristics of safety, innocuity, no side-effect, and low-cost. This Special Issue emphasizes researches in developing fields, as well as papers showing the interaction between environmental disciplines and other disciplines. It provides a platform to exchange and update new insight into the link between green remediation/restoration science and technology, environmental fate, risk assessment, and ecotoxicity, All types of papers that fall within the above research areas are welcome. This Special Issue will be a bridge between environmental scientists and engineers, soil and water scientists, hydrologists, microbiologists, and environmental policy makers.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
