

## Special Issue

# Green Roadways and Management Sustainability

### Message from the Guest Editors

Sustainable development objectives have been applied to infrastructure in recent years, after being widely used for green buildings. The transport sector contributed 14% of total energy-related emissions in the world in 2010. As a part of transportation infrastructure, roadways utilize resources, consume energy, and generate carbon emissions. Thus, designing and constructing green roadways to reduce environmental impacts has become an important issue. This Special Issue addresses the above issues and aims to gather recent studies that advance the knowledge about green roadways and management sustainability. Green roadways can supplement green buildings to reduce the heat island effect in urban cities. Management supplements materials and technology methods in sustainability enhancement. Prof. Dr. Andrew Shing-Tao Chang

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
