

## Special Issue

# Greening Cities for Improved Health

### Message from the Guest Editor

Cities are widely recognized as risky environments for human beings. Risks to health and wellbeing are measured in three groups of indices: physiological, emotional and cognitive. The environmental factors that are analyzed in studies include physical factors like noise, thermal load, and air pollution, and social factors like sense of discomfort, crime, transportation, and access to health services. Some studies even argue that stress and risk to health are intrinsic to urban environments and that restoration is intrinsic to green environments. Additional discussion then develops about the spaces that can be greened and their effect on city environments. The effect of size and distribution of parks, vegetation on houses walls and roofs, and the effects of different types of vegetation are also discussed. The purpose of this Special Issue is to add knowledge to the knowhow regarding greening of our cities. We invite authors to raise awareness on different aspects of the problem or to contribute relevant knowledge to any of the aspects of this issue as mentioned in the introduction.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
