Research on Public Management, Urban Entrepreneurship and Sustainability

Message from the Guest Editors

Given the UN's 2030 Agenda Sustainable Development Goals, sustainability studies have gained increased attention from the scientific. Based on this, the role of entrepreneurs and micro-, small- and medium-sized enterprises has steadily gained recognition and been considered as feasible to develop people's latent talents to transform ideas into action and to utilise entrepreneurship to find possibilities with economic, social, and environmental value creation potential. In these conditions, entrepreneurship is related to new models of making companies smart, and it plays a critical role in the establishment of sustainable corporations in cities. Cities all around the globe strive to become smarter as part of their strategic and creative urban plans aimed at tackling current urban concerns and dangers.

Smart cities create millions of transactions and a large amount of data. This created data adds value to governments and businesses, improves business interaction and sustainability. Furthermore, competent public administration may increase the quality and efficiency of services provided in order to achieve sustainable urban growth.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits
