

Special Issue

Biodiversity Management in Sustainable Landscapes

Message from the Guest Editors

Agriculture and other human activities are dramatically reshaping landscapes around the world, leading to habitat destruction and fragmentation, frequent biological invasions, and other environmental alterations that deeply impact biodiversity. In this scenario, it becomes pivotal to devise landscape-level management plans aimed at harmonizing land use with biological diversity and ecosystem service preservation, while countering the spread of pests and invasive species. In this Special Issue, we welcome research articles and reviews which cover all aspects of biodiversity conservation, including ecosystem service enhancement, invasive species management, ecological intensification in agriculture and conservation biology for rare species, with a particular focus on landscape-level approaches. We equally welcome papers which advance our knowledge of biodiversity–landscape interactions and ecological functions, as well as applied research on wildlife and landscape management strategies and their outcomes. We look forward to receiving your innovative contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
