

## Special Issue

# Emerging Sustainable Materials and Technology

### Message from the Guest Editors

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Development of novel nanostructures through a green synthesis route
- Development of materials for energy storage
- Emerging materials for efficient sustainable energy and environment devices
- Carbon-based nanostructures for the development of sustainable devices
- Lifecycle analyses of sustainable technologies
- Development of Sustainable optoelectronic devices
- Waste management for the development of emerging materials
- Bio-medical application of emerging and sustainable materials
- Simulation studies in the development, characterization and application of emerging materials
- Sustainable fuel generation through the process of catalysis using emerging materials

We look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
