New Urban Agenda and New Urban Studies: A Sustainable Planning Toolkit

Message from the Guest Editor

While it is generally agreed among scholars, practitioners and decision makers that the general objective of making cities smart, green, inclusive and resilient should be pursued, during implementation, technical, economic and social issues and local conflicts demonstrate the fragility of the complex process of scaling global targets in local actions. However, there is not a predefined formula to ensure the success of an urban sustainable development strategy. Therefore, a predetermined abacus of design solutions developed for major urban areas has to be scaled and adapted carefully in order to achieve results in small villages. These differences are evident in the most reliable applied research but do not have a normative enough basis to balance the differences between the main urban poles and rural settlements, assuming that citizens hold the same rights in sustainable development. The Special Issue invites the submission of the latest high-quality theoretical and empirical research articles to uncover the latest developments in applied sustainability at the metropolitan and small-town scales.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
