

## Special Issue

# Sustainable Logistics Management: Research Focus on Port and Maritime Transportation

### Message from the Guest Editor

The maritime and port sectors are undergoing profound transformations due to the combined pressure of sustainability imperatives, digital innovation, and global trade dynamics.

We invite theoretical, empirical, and case-based research that investigates how port authorities, logistics operators, and maritime companies are adapting strategies, technologies, and policies toward more sustainable operations, and the topics may include, but are not limited to, decarbonization strategies, digital twin applications in logistics, circular economy in port areas, smart port governance, modal shift incentives, and sustainability assessment frameworks. This Special Issue aims to advance academic and practical understanding by highlighting contradictions between sustainability discourse and practice, proposing innovative tools, and drawing attention to the global–local interface in maritime logistics sustainability.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
