Special Issue

Public Health Challenges and Sustainable Responses in an Era of Disasters, Conflict, and Climate Change

Message from the Guest Editor

Climate change exacerbates existing health inequities and strains our health systems, disproportionately affecting the most vulnerable populations. Simultaneously, prolonged conflict disrupts societal structures and complicates health outcomes. Hazards and disasters, which are becoming increasingly frequent and severe due to climate change, further challenge our abilities to maintain public health standards. These interdependencies underscore a growing necessity for a more holistic, cross-disciplinary approach towards achieving sustainable public health outcomes and disaster responses. With this in mind, we are proud to introduce this Special Issue. The intention of this Special Issue is not merely to underscore the urgency of these intersecting problems, but to foster interdisciplinary dialogue, generate innovative solutions, and illuminate the path forward. It relates closely to the broader scope of our journal-Sustainability-by expanding the discourse beyond traditional boundaries to address the more complex, multifaceted realities of the 21st century. I look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
