

Special Issue

Waste to Energy: An Approach Towards Sustainability

Message from the Guest Editors

MDPI's journal *Sustainability* calls for manuscripts for a Special Issue entitled "Waste to Energy: An Approach Towards Sustainability". This Special Issue seeks contributions that explore innovative methods and technologies for converting waste materials into energy with a focus on advancing sustainable practices that reduce environmental impact, promote efficient resource utilization, and support the transition to a circular economy. Submissions may cover topics such as technological advancements in waste conversion, policy and regulatory frameworks, economic viability, and case studies demonstrating successful implementation. The goal is to gather diverse perspectives and cutting-edge research that highlight the potential of waste-to-energy solutions to achieve sustainability goals. Researchers, industry experts, and policymakers are encouraged to contribute their insights and findings to this important field.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
