Household Food Waste: From an International Perspective

Message from the Guest Editors

The topic of food waste is becoming increasingly studied, pushing the need for policies to deliver evidence-based results of their contribution to food waste reduction (as per the goals outlined in SDG 12.3). Household food waste is particularly relevant, as it is the largest fraction in comparison to other stages of the food supply chain, and it usually contributes to increasing the fraction of urban waste. However, a majority of the national studies available are EU- and US-based, and a great heterogeneity of results is recorded within the UE as well, as a standardized methodology has only just been recently approved. We still do not know of any studies focused on the quantification and analysis of food waste drivers in large areas of the world, thus rendering the knowledge in the field as rather “eurocentric”. Moreover, the monitoring of policy measures is still largely unexplored at a scientific level...

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
