

Special Issue

Public Health and Health Emergency Disaster Risk Management during and Post COVID-19 Era

Message from the Guest Editors

COVID-19 has severely disrupted the health system, including human resources in the health sector, and overall health infrastructure, leading to overburdening of health services. However, rapidly increasing surge capacity and logistic services is challenging, especially in countries with pre-existing labor shortages, geographical disparities in distribution, or poor skill-mix profiles. During the pandemic, the dual delivery of COVID-19 and non-COVID-19 services were the core challenges of the service delivery response. Countries implemented various methods to help handle an increase in demand for both health and social services as a result of COVID-19, while continuing to offer other essential healthcare services.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
