

Special Issue

Sustainable Development Goals and Transformation in Higher Education

Message from the Guest Editor

Higher education in Post-COVID-19 times is challenged by numerous factors. Bridging the gap between academia and industry and promoting meaningful research towards the promotion of UN Sustainable Development Goals are viable responses to a new paradigm shift in higher education. The purpose of this Special Issue is to promote scientific dialogue for the social impact of higher education and its contribution to the vision of digital transformation. We are inviting multidisciplinary research related to four significant pillars and topics: Pillar 1. Foundations of SDG research and digital transformation in higher education: Pillar 2. Novel theoretical models, frameworks, and approaches for the integration of SDGs in higher education: Pillar 3. Digital transformation in all aspects of the value chain in higher education: Pillar 4. Higher education out of the box: new business models and new educational models: Pillar 5: Case studies and indicative projects: dissemination of key outcomes.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA
