

## Special Issue

# Green Materials in Engineering: Application and Recovery

### Message from the Guest Editors

Today, green materials and green technologies are increasingly being used in various fields of engineering. They are mainly aimed at reducing the harmful impact on the human environment, including the fauna and flora. The degree of usefulness of green materials can be different and can be achieved in different ways: the development of new environmentally friendly materials; waste management; the recycling of old materials; the recovery of the original properties of materials; the full or partial replacement of traditional materials with greener materials; and others. This Special Issue aims to increase the sustainability of human development through engineering by applying new and recycling old green materials. The Special Issue includes the following topics in engineering:

- The development of new environmentally friendly materials;
- The use of household and technogenic waste;
- The recycling of old materials with the purpose of improving green properties;
- The recovery of the original properties of green materials;
- The full or partial replacement of traditional materials with greener materials, etc.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
