

Special Issue

Challenge of Sustainable Healthcare Financing Across Eur-Asia and Emerging Markets in 2020s

Message from the Guest Editors

This Specialty Issue aims to gain profound knowledge on healthcare financing sustainability in the early years of the worldwide economic crisis of the 2020s. The main aim of healthcare structures is to protect and improve the health of a population. Ensuring this may put a heavy strain on resources. Therefore, when it comes to healthcare services, sustainability has to be taken into account as a main requirement and an important issue. We need to ensure the timely and cost-effective delivery of high-quality healthcare in the modern world, where fast changing and challenging circumstances and demands, mainly due to the increased web of globalization resulting from travel, and an increase in longevity are all putting pressure on healthcare systems. With these assumptions in mind, we need to investigate sustainable high-quality healthcare, ensure ongoing research and development in this complex subject, while ensuring quality of service and cost-effectiveness, with the objective being to develop innovative systems, solutions, and strategies to realize sustainability, especially in the main macro-areas.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
