

Special Issue

Innovation Management in Healthcare Organizations and Systems: Sustainability and Ethics Implications

Message from the Guest Editors

This Special Issue aims to advance current understanding on the managerial implications of new healthcare technologies for healthcare organisations and systems, in particular looking at the sustainability and ethical aspects. We refer to sustainability aspects as defined by the United Nations, hence looking at financial, social and environmental repercussions of innovative medical technology for healthcare organizations and systems. Ethical aspects include, but are not limited to, understanding the effects of technological innovation on health inequities in different contexts; considering the challenges related to the ethical use of the massive amounts of information produced by wearable devices and apps; illuminating the ethical dilemmas associated with the use machine learning and artificial intelligence, as diagnoses, prevention and treatment decisions risk moving away from patient-centred professional assessments. Conceptual and empirical contributions are equally encouraged, as well as studies using qualitative, quantitative and mixed-methods technique of enquiry.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
