

Special Issue

Healthy Diets from Sustainable Food Systems

Message from the Guest Editors

This Special Issue is on the broad topic of “Sustainable Diets from Sustainable Food Systems” and calls for papers that aim at addressing the different economic, social, environmental, and health aspects of a sustainable diet. The Special Issue welcomes research papers that address how food systems can be transformed to achieve food and nutrition security for all while ensuring that we protect our environment, natural resources, and limit the adverse effects of climate change on our planet’s future biodiversity and survival. Papers that address how the Eat Lancet diet, sustainable healthy diets, and other sustainable consumption patterns that are being promoted can be socially and culturally acceptable while also being economically accessible, especially in LMICs, are also highly welcomed. We also look forward to research that addresses how our food systems can promote equitable livelihoods while building resilience to vulnerabilities, shocks, and stress (ensuring the continued functionality of healthy and sustainable food systems).

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
