

## Special Issue

# High Energy Physics and Computer Science

### Message from the Guest Editor

The focus of this collection will be on technology and instrumentation for physics. The purpose is to study and review particle physics detector design, construction, and operations along with the computational needs to run High-Energy Physics (HEP) experiments.

Developments from ongoing experiments are expected to lead to the design of future HEP challenges.

Firmware/software for data acquisition systems and front-end electronics, commonly distinct domains, are here considered complementary with respect to the hardware of the detector instrumentation. Hardware and software have reciprocal duties, enabling to carry out frontier science and realize breakthrough discoveries. In this view, this Special Issue will provide a complete understanding of what current technology can achieve in term of detector performance along with the readout chain. New prototypes and concepts regarding hardware, firmware, and software configuration are also going to be featured.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
