

Special Issue

Safety in Highway-Rail Grade Crossings

Message from the Guest Editors

This Special Issue will focus on the topic of highway–rail grade crossing safety. Motorists hold most of the responsibility for avoiding collisions, so state and local highway authorities are responsible for implementing grade-crossing improvements, grade separations, and quit-zone improvements, while railroads need to work with government agencies to relieve operational and safety concerns. Safety is a very complex and sensitive concern for both government agencies and railroads, so it is very important for them to have better models and application tools to fully exploit and better understand safety-performance patterns and the effectiveness of safety-improvement operations at HRGCs.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
