# **Special Issue**

# Human-Robot Interaction, Wellbeing, and Stress Management

Message from the Guest Editor

Inheriting from human-machine/computer interaction, human-robot interaction can contribute to well-being. Specifically, this Special Issue encompasses a selection of papers covering the way social robots are becoming ubiquitous in our social space and how that leads to the emergence of new forms of social friction. Even though there is still a long road to travel to full autonomy, as societies learn how to behave with robots and how to use them it is only natural that stress emerges, and rejection may even overcome any novelty effects. This may be the case, for example, of robots used in healthcare, a particularly sensitive area, where stressful situations are, in general, to be avoided. The sustainability of the entanglement between humans and robots depends on our ability to question the dynamics of robotic technologies and people. This selection aims at setting a ground for future reflections on these topics.

- Social Robotics
- Robotics and Automation
- Wellbeina
- Stress Management
- Human-Robot Interaction
- Robot interfaces
- Usability
- Human-Robot Mixed Societies

# **About the Journal**

# Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

### **Author Benefits**

## Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
