

Special Issue

Human Behavior, Urban Health and Sustainability

Message from the Guest Editors

Even if the ongoing, two-year COVID-19 pandemic were to suddenly come to an end, it is expected that similar infectious disease outbreaks may occur again as viruses adapt to the environment and spread across species, especially due to increased human mobility around the world. Therefore, from the perspective of global sustainability, more focus should be given to urban health infrastructure and community resilience in future urban development. In this vein, human behavior data can offer an approach to studying the interaction between urban residents and urban spaces and their mechanisms, thus providing a basis for achieving the above goals.

Contributions to this Special Issue may include (but are not limited to) the following topics:

- (1) Planning and spatial layout of urban medical and health facilities.
- (2) Public space optimization based on human behavior.
- (3) Modeling and simulation of infectious disease spread in urban space.
- (4) Community resilience for disease prevention and control.
- (5) Architectural design for healthcare against infectious diseases and epidemics.
- (6) Analysis of the spatiotemporal behavior of residents under epidemic transmission.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
