Special Issue

Modelling and Simulation of Human-Environment Interactions

Message from the Guest Editor

We are pleased to announce the development of a Special Issue on "Modelling and Simulation of Human-Environment Interactions". Computational models provide intelligent environmental decision support systems to understand how human decisions are shaped by, and contribute to changes in, the environment. The complexity of these systems is reflected by the abundance of open questions in modelling and simulation:

- At the design stage, we need to identify the right set of methods, deal with issues in the data, and efficiently work with the community.
- At the implementation stage, we need to create models that can perform simulations efficiently, integrate with other systems, or support a high level of interactivity with decision-makers.
- When results are generated, we need to account for uncertainty, analyze their output, and validate them depending on the social and environmental context of use.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
