

Special Issue

Sustainability Meets Humanitarian Logistics

Message from the Guest Editors

The relevance of this special issue lies in the rapid spread of sustainability concept that is provoking a deep transformation in the manner we design, plan, and operate organizations. Important questions are raised, such as:

- Is – or should be – the field of humanitarian logistics concerned by sustainability?
- How sustainability is defined – or should be redefined – to fit the specificities of humanitarian logistics?
- How the sustainable aim fits the ephemeral nature of some humanitarian interventions?
- Does the sustainability concept apply to humanitarian interventions, to humanitarian organizations, or both?
- How the different stakeholders' goals can be adequately integrated and prioritized?

We expect this special issue to consolidate the most recent knowledge on the field; to promote and facilitate works filling the gap between practical needs and research; to suggest specific future research avenues; and last but not the least, to inspire researchers to engage in this important and promising research field.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
