

Special Issue

Hybrid Energy System in Electric Vehicles

Message from the Guest Editors

This SI is a platform on the latest developments on HESS for electric vehicles can be shared. Researchers in this field are encouraged to contribute. The following topics are welcomed, but submissions are not limited to the list of topics below:

- Design, system engineering, and field applications of HESS for EV;
- Modeling, simulation, testing, and verification for renewable energy sources in HESS;
- Coordination sizing and energy management of HESS; Power conversion electronics for renewable energy sources;
- Power electronic architectures for HESS;
- Aging mechanisms of power converters and energy storage devices;
- Online estimation of state-of-charge, state-of-health, and state-of-power;
- Aging modeling and lifetime prediction; Power electronic architectures for HESS;
- Solid-state battery technology, hydrogen fuel cell technology, and supercapacitor technology;
- Machine learning, big data, and cloud computing in HESS applications;
- Real-time energy management and predictive optimization methodologies;
- Monitoring and predictive maintenance of HESS;
- Life cycle analysis, including re-use of HESS in second-life applications.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
