

Special Issue

Sustainable Monitoring of Soil Pollutants and Land Management Assessment

Message from the Guest Editors

The goal of this Special Issue is to compile the latest scientific and practical knowledge on environmental chemistry with a focus on soils, as well as on the technologies used for the sustainability analysis of soils. As such, original research articles, short communications, and literature reviews are welcome. Research areas may include, but are not limited to, the following:

- Applications of and advancements in analytical methods;
- Technological advancements: Improvements in techniques and skills for sustainable soil environment monitoring;
- Soil sampling, treatment, monitoring, and characterisation;
- Monitoring, occurrence, and identification of inorganic and organic pollutants in soils;
- Distribution (and enantiodistribution), transport, dissipation, and interactions of pollutants in soil;
- Environmental analysis and data treatment methods;
- Modelling and detection of soil pollution;
- Soil remediation strategies;
- Practical applications for sustainable land use.

Guest Editors

Dr. Laura Martín-Pozo

Dr. Carmen Mejías

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
