

Special Issue

Application of Remote Sensing to the Monitoring of Land Cover and Water Environment—2nd Edition

Message from the Guest Editors

The development of environmental remote sensing is changing quickly in terms of application areas and technical methods. Papers addressing these topics are invited for this Special Issue, especially those that combine a high academic standard with a practical focus on providing monitoring solutions for land cover and the water environment based on remote sensing technology. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: (1) Reviews on remote sensing applications to land cover and water environment monitoring; (2) Understanding the land-cover dynamics in urban and rural areas with high-resolution remote sensing images; (3) Developing remote sensing methods for monitoring the environmental conditions of water; (4) Identification, assessment, and response of disasters associated with land and water (e.g., earthquake, earth surface subsidence, red tide); (5) Evaluation of ecological risks in coastal or marine areas (e.g., oil spill pollution, loss of mangroves).

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
