

Special Issue

Sustainable Agriculture, Soil Erosion and Soil Conservation

Message from the Guest Editors

The Special Issue titled 'Sustainable Agriculture, Soil Erosion and Soil Conservation' will explore soil erosion issues and strategies for soil protection in the field of agriculture. Soil erosion is a global issue that not only affects agricultural productivity but also has profound impacts on ecosystem health and climate change. The Special Issue will include the latest research findings from experts around the world, such as the establishment of soil erosion models, the development of soil protection technologies, and case studies on policy and management practices. We pay special attention to research that can provide practical solutions for farmers and decision-makers to promote sustainable development in agriculture.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
