

## Special Issue

# The Inspiration of Science and Science Education in Environmental Sustainability

### Message from the Guest Editors

As global environmental issues become severe, science and science education play a more crucial role in environmental sustainability. Challenges that prevent sustainable, eco-friendly practices are creating huge threats to the future and well-being of humanity.

Through scientific research and science education, the society makes essential progress in understanding the causes of environmental problems and exploring potential solutions, and the public gain a deeper understanding of the impacts of human activities on the natural environment, fostering a new generation participating in environmental protection and sustainable development.

As global environmental challenges grow pressing, science and science education are pivotal for driving innovative technologies and essential for guiding society for a sustainable future. We aim to gather insights from experts across diverse fields to explore how scientific inspiration and education can enhance environmental awareness and promote sustainable resource use.

Researches may include the following: Science Education, Environmental Education, Sustainability Education, STEAM, Green Energy Science, etc. We look forward to your contributions.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
