

Special Issue

Achieving Sustainability in New Product Development and Supply Chain

Message from the Guest Editor

Dear colleagues, The Special Issue will provide the opportunity to disseminate and discuss recent developments in the field of sustainability in product development and supply chains, key stages in establishing a mutually beneficial relationship between the industrial sector and the natural and social environment. Existing literature in the field that contains an in-depth understanding of the complexities of the production sector is still limited, and there are competing interpretations in various schools of thought. By providing space for case studies and concrete applications, while at the same time critically analyzing the benefits and drawbacks of various models, this Special Issue will enable academics and practitioners to advance the sustainability impact of their work. Within this context, this Issue aims to analyze the relationship between the concept of sustainability and related frameworks that strive to achieve complementary goals such as circular economy, ESG, low carbon/net zero production, etc.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
