

Special Issue

Sustainable Construction Materials Evaluation

Message from the Guest Editors

Within the scope of this Special Issue of *Sustainability* are case studies and general assessments related to any type of construction materials and technologies—transportation infrastructure, building materials, raw materials for use in construction, etc. The proposed questions that need to be answered include:

- Materials for construction (compacted gravel, asphalt, concrete, bricks, stones, wood, composites, steel, etc.)—can they be made more sustainable through processes, through raw material selection, or through improved properties?
- Can sustainable technologies and products increase the safety and well-being of our entire society?
- What are the risks and hazards associated with the implementation of sustainable technologies in construction?
- How can it be ensured that the use of sustainable materials will not just shift the environmental burden instead of lowering it?
- What is the cost (financial, social, competitive, environmental) of implementing sustainable technologies and products?...

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
