

Special Issue

Diversification of Urban and Peri-Urban Horticulture for Future Sustainability

Message from the Guest Editor

This Special Issue of Sustainability, entitled "Diversification of Urban and Peri-Urban Horticulture for Future Sustainability", explores innovative approaches and strategies that will enhance the sustainability of urban and peri-urban horticulture practices, and investigates various aspects of urban horticulture. We welcome contributions that examine the potential of diverse horticultural techniques, such as vertical farming, agroforestry, and community gardens, to promote sustainable food production, conserve biodiversity, and strengthen urban resilience. Authors may also submit articles that encompass the multifaceted aspects of urban and peri-urban horticulture. This Special Issue aims to contribute to the existing literature on urban agriculture and sustainability, providing valuable information for academics, practitioners, and researchers that will aid in advancing global horticultural sustainability. Ultimately, this collection of articles strives to foster a deeper understanding of the role of urban horticulture in shaping more sustainable and resilient urban food systems for the future.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
