Special Issue

Sustainable Safety Culture in Manufacturing Enterprises

Message from the Guest Editors

The development of an effective, safe, and healthy work environment is a crucial element for the success of manufacturing enterprises. Sustainable management of safety culture has emerged as a fundamental component of management strategies in many countries. This Special Issue aims to gather research on multiple facets of safety culture management within manufacturing enterprises. Contributions will employ diverse methodologies, such as case study analyses, literature reviews, empirical research, and technological applications. By assembling this body of work, we strive to enhance the understanding of the challenges manufacturing companies face and the sustainable management of safety culture. This Special Issue will also serve as a resource for policymakers and strategic planners by highlighting successful case studies and best practices in safety culture management. By presenting research that links safety culture with sustainability objectives, this Special Issue will offer actionable insights and recommendations for developing policies and strategies that promote both safety and sustainable development.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
