

Special Issue

Information and Communications Technologies (ICT) for Sustainability

Message from the Guest Editors

We invite papers from a broad range of topics connected to Information and Communications Technologies (ICT) for Sustainability to this Special Issue. ICT through digitalization is affecting all parts of society and changes the preconditions for, and opportunities of, sustainability. We are in an era of both digitization and digitalization, with the first focusing on the technical development and the latter on the use of this development. This Special Issue is covering both these changes, and their relation to mainly environmental and social sustainability. Received papers are expected to include (but are not limited to) the following examples that all ought to discuss ICT and sustainability implications: ICT in a transforming society, changing practices and lifestyles, smart technologies and the environment, ICT applications for decision support in organizations, assessing and reducing the direct environmental impact of ICT, and sustainability assessments of ICT-based solutions. We are foreseeing contributions covering for example topics related to energy, cities, transport and food and we highly encourage interdisciplinary work.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
