

Special Issue

ICT Technologies for Sustainable Integration of Renewable Energies

Message from the Guest Editor

For this Special Issue, we are welcoming papers from a broad range of topics associated with information and communications technologies (ICT) for renewable energy (RE) integration. ICT can play an important role in energy management, conservation and efficiency through sensing and control for REs integration. ICT can also contribute to higher resource utilization through shared systems and increased efficiency driven through smarter appliances, infrastructure, and manufacturing. This Special Issue covers ICT-enabling capabilities to manage the volatile and distributed nature of renewable energy sources connected to the smart buildings and/or smart grids. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- ICTs for energy management;
- Internet of Energy for REs integration;
- ICTs for energy efficiency;
- Machine learning for renewable energy applications;
- Data mining techniques for renewable energy evaluation;
- Sustainability assessments of ICT-based solutions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
