

## Special Issue

# Examining the Belt and Road Initiative in the Context of Africa's Economic Future

### Message from the Guest Editors

This Special Issue explores the role of China's Belt and Road initiative for sustainable transport and logistics connectivity in Africa for socio-economic progress. It will collate a collection of papers which, in addition to examining the architecture of the project, will critically interrogate the anticipated benefits against potential social, economic, and political challenges. Since its inception in 2013, the BRI has attracted a lot of international scrutiny and debate, particularly surrounding its design and architecture, speculations about its role in China's global political ambitions, and the potential socio-economic and environmental implications (both globally and specifically for participating countries). As its implementation progresses, the literature has turned to the initial impacts for the connectivity of global logistics, particularly to the emerging patterns of regional connectivity and the associated international infrastructure projects. This Special Issue will extend these debates, with a focus on one of the key regional links in the BRI—the African continent.

### Guest Editors

Prof. Dr. Victor Gekara

Dr. Rose Luke

Dr. Joash Mageto

Dr. Thomas Ombati

Dr. Gituro Wainaina

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
