

Special Issue

Environmental Life Cycle Assessment of Conventional, Non-conventional and Bio-Based Construction Materials

Message from the Guest Editors

The development of construction projects requires an effective description of improvement strategies to enhance the building performance over the entire life cycle, particularly in terms of environmental impact evaluation and sustainability. Construction materials play a major role in integrating different domain models, such as indoor environmental quality, reducing greenhouse gas emissions, thermal comfort, pollution, and energy efficiency, and protecting the built environment. In this Special Issue, we particularly welcome the submission of scientific contributions in the areas of natural sciences, engineering, and technological applications including (but not limited to) conventional, non-conventional, and bio-based materials and their environmental sustainability and carbon footprint, as well as life cycle impact assessment, pollution assessment, and energy performance design in buildings.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
