

## Special Issue

# Applications of Artificial Intelligence in Sustainable Education

### Message from the Guest Editor

This Special Issue invites submissions that focus on the applications of artificial intelligence in promoting sustainable education. We welcome research papers based on empirical data or typical cases that explore how artificial intelligence supports curriculum development for sustainable development, teaching evaluation, and education management—for example, efficient learning with the help of artificial intelligence, sustainable literacy assessment based on natural language processing, interdisciplinary sustainable course designs with the aid of artificial intelligence, etc.—so as to advance theoretical innovation and practical dissemination in the cross-field of artificial intelligence and sustainable education. I look forward to receiving your contributions.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
