

Special Issue

Sustainable Geography and Urban Planning: Urban Ecology, Livability, Nature Connection, and Water-Sensitive Urban Design

Message from the Guest Editors

We invite you to submit articles in the Special Issue. In the face of growing challenges related to climate change, the urgent need for urban adaptation, the biodiversity crisis, dynamic urbanization, and deepening inequalities—both spatial and social—redefining the interrelationships linking the urban, natural, and social environments has become essential. This Special Issue will promote an interdisciplinary and innovative approach to research on the urban fabric, viewed as a complex socio-ecological system. Our aim is to shed new light on the challenges of planning sustainable cities, drawing on emerging trends and knowledge in climate adaptation, ecology, and social justice, as well as on the resulting implications for residents' quality of life. We encourage the submissions that not only identify the challenges facing contemporary cities but also present innovative and sustainable urban models, along with policies that support the development of green cities based on the integration of nature with urban infrastructure. We welcome a variety of formats, including empirical research, literature reviews, case studies, theoretical concepts, and examples of good practices.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
