

Special Issue

The Impact of Industry 4.0 on Sustainability and the Circular Economy

Message from the Guest Editors

This Special Issue aims to reveal the high potential of Industry 4.0 in supporting implementation, and the integration of sustainability and CE practices in the industrial domain. In line with this aim, research contributions that focus on the identification of relationships, synergies, complications and challenges between Industry 4.0, sustainability and CE concepts are particularly encouraged. Hot research areas include, but are not limited to:

- The relationships between the I4.0 and the economic, environmental and social dimensions of sustainability, and their specific indicators, e.g., energy consumption, emissions, health and safety, etc.
- I4.0 concepts and models for facilitation and/or catalysis of industrial implementation of sustainability and CE
- The enablers and barriers/complications to the adoption of I4.0-based sustainability and CE
- I4.0-based decision making models for integration, and the improvement of organizational and supply chain sustainability
- I4.0 and associated response strategies to industrial sustainability issues (e.g., security of supply, occupational health and safety etc.) introduced by the COVID-19 pandemic

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
