

Special Issue

Carbon Emission Mitigation: Drivers and Barriers

Message from the Guest Editors

We are pleased to launch a new Special Issue focusing on new insights into the drivers and barriers towards carbon emission mitigation.

Carbon emission mitigation is central to achieving sustainable development and countering climate change. Albeit the past few decades have seen some positive developments and global efforts in cutting greenhouse gas emissions, the potential for further mitigation is in doubt after “the low-hanging fruit has been picked”. The next phase of carbon emission mitigation will entail close attention to hard-to-decarbonize sectors and carbon-intensive economies. Sectors, such as heavy industries, power generation, and road transport are significant contributors to carbon emissions and, for different reasons, are difficult to decarbonize. Economies, such as China, the United States, and India, are the biggest greenhouse gas emitters and their low-carbon transitions are of key significance in combatting climate change.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
