

## Special Issue

# Impact of Urbanization on Declining Groundwater Level and Water Quality: Understanding Environmental Sustainability of Emerging Contaminants

### Message from the Guest Editors

Topics for this Special Issue include but are not limited to:

- How urbanization affects spatiotemporal changes in groundwater level and water quality?
- What are the factors and processes associated with changes in water quality parameters?
- How is urbanization linked to changes in groundwater geochemical processes?
- Quantification of the role of urbanization in terms of groundwater sustainability
- Can we predict future changes in groundwater environmental in the context of urbanization?

This Special Issue is open to all types of research related to urbanization and its link to groundwater quantity in addition to how emerging contaminants influence this quality, from local to regional scales, using a combination of remote sensing application, GIS, and field data analysis.

---

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
