

Special Issue

Improving Pro-environmental Behavior through Multidisciplinary Approaches

Message from the Guest Editors

The aim of this Special Issue is to contribute to knowledge related to the development of interventions for improving pro-environmental behavior, with application in all fields of sustainable development.

Taking into consideration the urgent need to take action to improve the quality of life of each human being and their environment, it is crucial to establish which factors determine whether people act in an environmentally friendly manner, and which specific measures effectively lead to individual and collective actions with positive impacts on the environment. We invite contributions addressing any aspect of pro-environmental behavior, with an emphasis on interdisciplinary approaches that can explore the complex and comprehensive character of the subject. Aiming to understand the present human conduct and its immediate and future impact on the environment, one focus should be on identifying, defining, investigating, developing, or assessing the types and directions of interventions on all dimensions: technical, technological, economic, educational, motivational, organizational, institutional, and regulatory.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIplus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
