

Special Issue

Incentives for Sustainable Economic Growth and Societal Wellbeing

Message from the Guest Editors

Dear colleagues, The current pandemic outbreak of Covid-19 has changed the world, slowing economic growth, and deteriorating the wellbeing of individuals across the globe. Moreover, the pandemic outbreak has brought to light social, structural, and other deficiencies of national economies, which make economies more vulnerable to economic shocks. Under conditions of the current pandemic, it is extremely important to renew sustainable economic growth, ensure appropriate risk management resilience, as well as to provide for an adequate level of institutional and individual support. It is vitally important to find the appropriate set of incentives for businesses and individuals to ensure sustainable economic growth. This special issue focuses on both theoretical and practical initiatives for effective sustainable economic growth, including, but not limited to financial or non-financial incentives, e.g. behavioural nudges, state and regional tax incentives, social and environmental benefits, risk management and other measures that may help to stimulate sustainable economic growth and ensure individual wellbeing of people.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
