# Industrial Ecology for Sustainable Development

### Message from the Guest Editors

Industrial ecology aims to apply the lessons from the functioning of the ecosystem for balancing society's manufacturing and consumption obsessions with environmental conservation by systemically collating firms and business processes through a circular system. Wider adoption and applications of emerging tools have proven to improve agglomerate economies, regional clusters, networking between firms, and technologybased integrated assessment models of the resulting "industrial ecosystems", which exemplifies the developmental aspect achieved in harmony with environmental conservation. With current resource use and economic infatuation, long-term sustainability is of utmost importance and the resource and impact decoupling scopes offered by retrofitting industrial ecology in production systems will aid toward this goal. This Special Issue is an attempt to capture the progress of industrial ecology for achieving sustainable development in general.

## **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
