# Industrial Sustainability Assessment and Communication: Metrics, Methods, and Tools

# Message from the Guest Editors

The interest of industries in the sustainability performance of their production processes and products, as well as in the communication of their sustainability impacts, has grown strongly in recent vears. This phenomenon can be observed on a global level, since the pressure from stakeholders towards industries is increasing worldwide. This highlights the need for approaches for the evaluation and communication of sustainability performance that can provide reliable and credible results, thus, discouraging greenwashing practices aimed at deceiving customers and the general public. This Special Issue will promote research concerning the assessment and communication of industrial sustainability, both at a global level and with respect to each of its three dimensions (economic, environmental, social).

# **About the Journal**

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
